Portfolio: <https://jjfnavarro.github.io/Portfolio/>

Education

Ateneo de Davao University

Bachelor of Science in Information Technology

Davao City, Philippines

June 2026

Experience

OHA Traveller's Inn

Freelance Full Stack Developer

Panabo City, Philippines

July 2026 - Present

- Built a React, Express.js, and MySQL motel management PWA for rooms, reservations, check-in/check-out, multi-day stays, configurable rates, and stay extensions.
- Implemented payments, expenses, Mini Store sales, historical pricing, PDF/Excel reports, role-based authorization, and audit logs; added automated tests and deployed on Railway.

4RN Meat Shop

Freelance Full Stack Developer

Panabo City, Philippines

June 2026 - Present

- Built and deployed a Next.js and PostgreSQL system on Railway for five branches, covering POS, inventory, transfers, expenses, customer credit, and daily closing.
- Implemented ledger-based stock tracking, split payments, cash reconciliation, branch permissions, audit logs, and report exports; tested with Vitest and Playwright.

Clever Kobweb

Full Stack Developer Intern

Davao City, Philippines

February 2026 - April 2026

- Developed a React, Express.js, and MySQL community website for Filipino-Chinese Catholic Youth (FCCY) Philippines; collaborated on authentication, database management, and system integration.

Projects

Pickleball Court Management System

September 2026

- Built a multi-tenant court-booking PWA using React, Express.js, Prisma, and MySQL, with staff permissions, conflict-safe reservations, automated tests, and GitHub Actions CI.

S.H.I.E.L.D. IoT Crash Detection System | Capstone

2025

- Developed an ESP32 crash-detection system integrating an accelerometer, GPS, and cellular modules.

ADDVentures Innovation Center CMS

2025

- Built a WordPress CMS with WooCommerce integration for an institutional client.

UniJobs Campus Job Board App

2024

- Designed mobile UI/UX for job postings and student-employer matching.

CacaoTech Agricultural IoT Mobile App

2023

- Designed Figma interfaces for a mobile app connected to an automated cacao dryer.
